# about us

Arghavan is the leading exhibition stand design and fabrication company, serving corporate and industrial clients since 2006. We are providing turnkey exhibition solutions from concept to execution in Pakistan and Middle East, especially the UAE.

Our core expertise includes creative concept design, 2D/3D modeling, exhibition stand fabrication, display and kiosk manufacturing, development of portable, modular exhibition kits and corporate event management.

# services

Exhibitions, trade shows, commercial fairs, conferences, seminars and business conventions are all key opportunities to bring products and services some much needed limelight. According to Tradeshow Institute, on average 28% of the total budget is consumed only on renting floor space\*. You need to make sure that every shot counts and break through the clutter. That's where we come in; we provide personalised and professional exhibition services to distinguish you from the herd and be remembered long after the curtain call.

Our dedicated team of creative designers, project managers and craftsmen can help you in building your next customized exhibition stand or branding traditional shell scheme that will truly communicate your brand message for your target customer and register a meaningful impact.

We guarantee that our design will meet your brief, your budget requirements and most importantly will allow your brand to truly stand out.

# design process

It all begins with a free consultation meeting where we discuss our client's requirements, the brand proposition and KPIs that the company is trying to achieve through a project. Our design team will create mock-ups for your bespoke exhibition stand based on your brand guidelines.

Once the design mock-ups are approved, our production team develops and manufactures all aspects of your project in-house to the requisite standards. Our in-house craftsmen can incorporate marketing props, design one-off custom pieces and incorporate wood, acrylic, aluminium, steel and LED systems into any exhibition stand design as per requirement.

We also offer portable exhibition systems that can be easily transported and installed by company staff such as 'off the shelf modular exhibition stands'.
